Calima appoints leading engineering firms – Ramdar & Trialta for upcoming drilling operations

Highlights:

- Ramdar Resource Management, a leading Calgary engineering and resource management firm, appointed to manage Calima's drilling and completion operations.
 - Trialta Projects appointed to provide design, engineering and construction management for facilities and pipeline infrastructure.
 - These Canadian firms are market leaders in their fields with extensive operating experience and knowledge of the Montney Play to complement the Calima team in Canada.
-

Calima Energy Limited (ASX:CE1) ("Calima" or the "Company") operates 72,014 acres of drilling rights over acreage (the Calima Lands) in in the world-class Montney oil and gas play in Canada, has made two key appointments for its upcoming drilling campaign.

The Company is delighted to announce it has appointed two highly-regarded Canadian engineering firms that have extensive experience within the Montney Play, having worked with many of the leading operators active in the area, including Encana and Arc Resources.

Ramdar Resource Management (Ramdar) specialise in wellsite and drilling engineering management. They have been involved in Montney drilling since the inception of the play in 2005 where they supported delineation drilling, prior to drilling the first horizontals within the play.

Trialta Projects (Trialta) is actively involved in projects across British Columbia, Alberta and Saskatchewan. They will manage all of the engineering, procurement, construction and management services (EPCM) for the facilities and pipeline activities associated with the Calima Lands.

Neil Darling, Ramdar’s founding partner commented:

“Ramdar is thrilled to have been appointed the lead engineering Company for Calima’s upcoming drilling and completion project. Ramdar looks forward to working with Calima and providing proven Montney expertise.”

Alan Stein, Calima’s Managing Director commented:

“These two well respected companies bring with them a wealth of Montney experience and we are delighted to have them join the team, further building our local operating team in Canada and providing best in class services and experience.”

About Ramdar Resource Management:

Ramdar has drilled and completed in excess of 1,600 unconventional Canadian wells, of which ~600 are horizontal Montney wells in NE British Columbia. The client base that includes some of the most active producers in the Montney. In 2005, Ramdar drilled the first ever mono-bore horizontal well in the Montney play and has been drilling ever since. With the dramatic expansion of the Montney resource plus technological advancements in drilling & completions, Ramdar have been assisting oil companies in services that range from proving initial productivity through to full scale development. <http://www.ramdar.ca/>

About Trialta Projects:

Trialta Projects is a full service EPCM firm operating in Calgary with expertise in life cycle project execution of small to medium scale oil and gas development. Trialta has proven experience throughout Western Canada developing and delivering energy projects in a value added, efficient and concise manner. <http://www.trialtaprojects.com/>

About Calima Energy

Calima Energy Limited (ASX:CE1) is an international oil and gas company with over 72,000 acres of drilling rights prospective for the Montney Formation in British Columbia, the most active oil and gas play in Canada.

Calima, which features a board and management made up of some of the most successful oil and gas executives of recent years, is fast-tracking a major oil and gas opportunity in one of the world's most successful and sought after plays.

The Company is preparing to drill several wells close to existing infrastructure, including pipelines and processing facilities.

Calima's neighbours in the Montney include international operators Shell, ConocoPhillips and PETRONAS, as well as Canadian producers Black Swan Energy, Saguro Resources and Painted Pony Energy. The region's liquids-rich hydrocarbon reserves are being targeted for LNG export alongside domestic and international oil market opportunities.
